

Rahul Prajapati

Senior Software Engineer Platform

Senior software engineer platform building reliable, automated platforms and AI agents across GCP, AWS, Azure, Kubernetes, Terraform, GitOps, service mesh, CI/CD, and observability.

TECHNICAL SKILLS

Cloud: GCP, AWS, Azure, IAM, VPC, load balancing, Cloud SQL

IaC, AI & Automation: Terraform, Ansible, agents, Python, Go, Bash

Observability: Prometheus, Grafana, Datadog, New Relic, Google Managed Prometheus

Containers: Kubernetes, GKE, Docker, Helm, ArgoCD, GitOps

CI/CD: GitLab CI, Jenkins, CircleCI, Harness, Cloud Build

Platform: Teleport, Istio, Anthos Service Mesh, Apigee, Cloud Run

PROFESSIONAL EXPERIENCE

AirAsia MOVE

Jun 2026 - Present | Bangalore, IN / Kuala Lumpur, MY

Senior Software Engineer Platform

- Leading Hotels platform modernization across Cloud SQL consolidation, Landing Zone migration, Redis/Memystore and Firestore planning, GKE hardening, AI automation, and SRE operations.
- Led full 7-phase STG Hotels MySQL consolidation end-to-end, from scope confirmation and inventory through target build, migration method, source prep, data migration, and app switchover.
- Coordinated service migration readiness for consolidated Landing Zone Cloud SQL using write-freeze planning, validation gates, rollback discipline, and stakeholder alignment.
- Authored reusable migration assets: E2E cutover example, Architecture Report Pack, Total Data Layer Migration plan, DMS/export-import runbooks, validation evidence, SSL bastion commands, operator checks, and SecretSync handling.
- Inventoried Hotels Memystore across STG/PRD, mapped Redis host/port/AUTH/TLS usage, documented blockers, and produced the Memystore Migration Plan plus reusable Redis migration example.
- Produced Firestore Landing Zone migration and right-sizing recommendations; resolved GKE hardening across config variabilization, internal DNS, log structuring, Workload Identity, admission compliance, secrets management, and control-plane exposure.
- Built agentic automation patterns for infrastructure inventory, migration evidence, validation workflows, runbook acceleration, and operational checks.
- Updated Terraform modules for WIF and secrets, promoted production changes, validated GitOps/ArgoCD deployments, explored service mesh discovery, and supported staging deployment/cutover readiness.
- Handled Hotels Kong gateway P0 incident, resolved 15+ 5xx spikes across SSO/LB, GKE, Life GKE, and Cloud Run, closed Cloud NAT exhaustion alerts, and delivered 10+ infra service requests including Kong paths, OTA resources, domain/DNS, and campaign scaling.

Alteryx

Jun 2024 - Jul 2026 | Bangalore, IN

Cloud Engineer

- Automated multi-cloud infrastructure across GCP, AWS, and Azure, reducing manual operations by 70%.
- Built 30+ Terraform modules and CI/CD pipelines, improving infrastructure delivery speed by 3x.
- Developed internal tools for merge request automation, disk cleanup, and service provisioning, cutting operations time by 40%.
- Managed 100+ Kubernetes clusters with ArgoCD, Helm, and GitOps-based delivery.
- Integrated Teleport access for Kubernetes, ArgoCD, databases, and internal tools, reducing onboarding time by 60%.
- Deployed Apigee Developer Portal and configured Google-managed SSL certificates for internal APIs.
- Implemented Anthos Service Mesh with Istio to improve microservice observability and security.

Zeotap

Nov 2023 - May 2024 | Bangalore, IN

DevOps Engineer

- Built monitoring and alerting workflows with New Relic, Grafana, and Google Managed Prometheus, reducing downtime by 25%.
- Implemented CI/CD pipelines with CircleCI and Harness to streamline artifact and workload delivery.
- Designed a private cloud networking solution on GCP for a client-facing architecture.

AirAsia

Apr 2022 - Oct 2023 | Bangalore, IN

Software Engineer DevOps

- Designed product infrastructure architecture for a 10x scaling strategy.
- Enabled GitLab CI for builds, artifacts, Kubernetes deployments, and end-to-end automation.
- Implemented multi-cluster architecture to support canary traffic and high availability.
- Migrated applications from GKE Standard to GKE Autopilot and introduced Anthos Service Mesh with Istio.
- Led frontend workload migration from App Engine to Cloud Run, reducing costs by 60%.

Seance Inc

Aug 2021 - Mar 2022 | Mumbai, IN

Cloud Engineer

- Developed infrastructure as code using Terraform with a modularized approach.
- Built networking infrastructure, GKE clusters, load balancers, managed instance groups, databases, and IAM.
- Migrated AWS resources into Google Cloud and debugged migration issues.
- Developed DevOps pipelines using Jenkins and Cloud Build to update managed instance group images.
- Applied cloud best practices for secure and reliable GCP resource management.

CERTIFICATIONS

- Google Cloud Certified Professional Cloud Architect
- Google Cloud Certified Professional DevOps Engineer
- Google Cloud Certified Associate Engineer
- GitOps with ArgoCD
- Microsoft Certified Azure Fundamentals

COMMUNITY

- Mentor at cloudclan.co for cloud native and DevOps learning.
- Technical writer on Medium covering cloud, security, and system design.
